Professional Summary

Computer Engineering graduate focused on Java backend and software development, with hands-on experience developing RESTful applications using Spring Boot, Spring Data JPA, Spring Security, and SQL databases. Developed backend systems spanning emergency response, event-driven processing, and temporal state reconstruction. Seeking Java Backend Developer or Software Developer opportunities.

Technical Skills

Languages: Java, SQL, HTML, CSS

Databases: MySQL, PostgreSQL

Backend: Spring Boot, Spring Security, Spring Data JPA, RESTful APIs

Tools: Git, GitHub, Maven, Docker, Postman, IntelliJ IDEA, VS Code

Additional: OOP, Geofencing, Apache Kafka

Experience

App Developer Intern – Codec Technologies Pvt. Ltd.

Mar 2025 – Apr 2025

- Developed application features through assigned projects and structured technical training during a one-month App Developer Internship.
- Executed development tasks and technical exercises, applying software development concepts in practical project workflows.

Projects

CareWave – Emergency Response & Personal Safety Platform

[GitHub]

Team Leader & Backend Developer

- Engineered a Java and Spring Boot backend for an emergency-response platform supporting SOS alerts, location tracking, notifications, and user services.
- Designed and implemented REST APIs and Geofencing workflows for location-aware emergency response and automated triggers.
- Integrated Firebase Cloud Messaging for real-time emergency notifications and performed backend integration, debugging, and testing.
- Led coordination across backend, frontend, and database components, driving system integration and delivery.

Chronos – Time-Traveling State Reconstruction Engine

[GitHub]

Java Backend / Systems Engineering Project

- Engineered a Java 21 and Spring Boot backend using event sourcing and immutable event streams to reconstruct application state at arbitrary points in time.
- Designed temporal queries, event replay, and snapshot-based optimization for efficient historical state reconstruction.
- Integrated PostgreSQL persistence, Apache Kafka event processing, Redis caching, and CQRS-based read models for asynchronous backend workflows.
- Implemented optimistic concurrency control, idempotent command processing, RBAC, audit logging, and REST APIs for consistent state management.

OutBox-Sync – Transactional Outbox Event Processing System

[GitHub]

Backend Developer

- Engineered a Spring Boot backend demonstrating reliable event delivery through the Transactional Outbox Pattern.
- Designed JPA/Hibernate and MySQL persistence for transactional application data and durable event storage.
- Implemented retry, failure-handling, event processing, and REST API workflows for asynchronous operations.
- Validated backend integration through API testing, debugging, and end-to-end workflow verification.

Education

Bachelor of Engineering (Computer Engineering)

2022 – 2026

Navsahyadri Education Society Group of Institutions, Pune
Savitribai Phule Pune University

Research Publications

- Design and Implementation of a Mobile-Based Emergency Alert System for Public Safety.** International Journal of Enhanced Research in Science, Technology & Engineering, Vol. 15, Issue 3, March 2026.
- Design and Development of a Mobile-Based Emergency Alert System for Public Safety Using GPS and Real-Time Tracking.** IRJMETS, Vol. 07, Issue 11, November 2025. DOI: 10.56726/IRJMETS85227.

Certifications

Oracle Cloud Infrastructure 2025 Certified Foundations Associate

Oct 2025

TCS iON Career Edge – AI Foundation
