Professional Summary

Software Developer with hands-on experience designing and building backend and full-stack applications using Java, Spring Boot, REST APIs, SQL databases, and modern software engineering practices. Experienced in developing reliable systems involving event-driven processing, transactional workflows, emergency response, and historical state reconstruction. Strong foundation in object-oriented programming, API development, databases, system integration, debugging, testing, and collaborative software development.

Technical Skills

Programming: Java, SQL, HTML, CSS

Software Development: OOP, RESTful APIs, Backend Development, API Integration, Debugging, Testing

Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate

Databases: PostgreSQL, MySQL, Redis

Architecture & Systems: Event-Driven Architecture, Event Sourcing, CQRS, Transactional Outbox Pattern, Apache Kafka, Event Processing, Event Replay, Idempotency, RBAC, Geofencing

Tools: Git, GitHub, Maven, Docker, Docker Compose, Postman, IntelliJ IDEA, VS Code

Experience

App Developer Intern – Codec Technologies Pvt. Ltd.

Mar 2025 – Apr 2025

- Developed application features through assigned projects, applying software development principles in practical development workflows.
- Executed programming, debugging, testing, and technical development tasks within a structured software development environment.

Projects

CareWave – Emergency Response & Personal Safety Platform

[GitHub]

Team Leader & Backend Developer | Java 21, Spring Boot, Spring Security, MySQL

- Engineered backend modules for an emergency-response platform supporting SOS alerts, live location tracking, GeoFence monitoring, guardian connectivity, and emergency notifications.
- Developed Spring Boot backend services and implemented GeoFencing and emergency notification modules for location-aware response workflows.
- Integrated Firebase Cloud Messaging and secure JWT-based authentication using Spring Security for emergency communication and protected APIs.
- Led a 4-member development team, coordinating backend, frontend, database integration, testing, debugging, and project delivery.

Chronos – Time-Traveling State Reconstruction Engine

[GitHub] [Live] [API Docs]

Software / Systems Engineering | Java 21, Spring Boot, PostgreSQL, Kafka, Redis

- Engineered a Java 21 and Spring Boot backend using immutable Event Sourcing and snapshot optimization to reconstruct application state at arbitrary points in time.
- Designed temporal queries, event replay, and `stateAt(T)` reconstruction for deterministic historical state analysis and state recovery.
- Implemented Transactional Outbox messaging, Apache Kafka event processing, idempotent consumers, CQRS read models, and Redis caching for asynchronous workflows.
- Implemented optimistic concurrency control, RBAC, JWT authentication, audit logging, schema upcasting, and REST APIs for consistent and secure state management.

OutBox-Sync – Transactional Outbox Event Processing System

[GitHub]

Backend Developer | Java, Spring Boot, JPA/Hibernate, MySQL

- Engineered a Spring Boot backend demonstrating reliable event delivery through the Transactional Outbox Pattern.
- Designed JPA/Hibernate and MySQL persistence for transactional application data and durable event storage.
- Implemented retry mechanisms, failure handling, event processing, and REST API workflows for reliable asynchronous operations.
- Contributed to backend integration, API testing, debugging, and end-to-end validation of event-processing workflows.

Education

Bachelor of Engineering (Computer Engineering)

2022 – 2026

Navsahyadri Education Society Group of Institutions, Pune

Savitribai Phule Pune University

Research Publications

- Design and Implementation of a Mobile-Based Emergency Alert System for Public Safety.** International Journal of Enhanced Research in Science, Technology & Engineering, Vol. 15, Issue 3, March 2026.
- Design and Development of a Mobile-Based Emergency Alert System for Public Safety Using GPS and Real-Time Tracking.** IRJMETS, Vol. 07, Issue 11, November 2025. DOI: 10.56726/IRJMETS85227.

Certifications

Oracle Cloud Infrastructure 2025 Certified Foundations Associate

Oct 2025

TCS iON Career Edge – AI Foundation

Aug 2026
